
MULTIPLIER CONFERENCE / LITHUANIA**"NEW TECHNOLOGIES AND CREATIVITY: GUIDELINES"**

<http://www.lieporiai.lt/?s=konferencija>

The Multiplier Conference "New Technologies and creativity: guidelines" was organized on May 4th 2017 by our school and was open to key experts, administrators, teachers, students who were interested in the topic and wanted to share and find out about others' experience and achievements in applying new technologies in teaching and learning process.

Two parts of the conference focused on:

- dissemination of intellectual output "A Guide of Creation of Interactive Practice Tests"
- sharing experience in creative use of new online interactive tools and new technologies

During the first part of the conference the participants had the opportunity:

- watch the interdisciplinary lessons in which interactive testing tools were used and discuss the observed lessons

- participate in workshops to create online interactive tests using a "A Guide of Creation of Interactive Practice Tests" <http://www.increase-erasmusplus.eu/index.php/a-guide-for-creation-of-interactive-practice-tests/>

After discussion of the lessons in groups, teachers came to a plenary meeting. The coordinator of the project made the keynote presentation "A Guide of Creation of Interactive Practice Tests".

Other presenters made reports on interdisciplinary education, a variety of latest teaching techniques, how to ensure a meaningful training (learning), what tools to use to create interactive tests and about the impact on teaching and learning process of e-Twinning projects.

The conference helped to develop ideas, raised visibility and gave inspiration to think about new strategies in approach to teaching and learning, contemplated the bigger picture of development in teaching
